PROFILE

As a motivated and passionate student at 1337 Benguerir (1337 BG), I am pursuing a rigorous peer-learning program in Software Engineering with a focus on problem-solving, collaboration, and hands-on coding projects.

SKILLS

- **Programming languages** : C, C++, Java, Python, HTML, CSS, JavaScript, PHP.
- **Databases** : MySQL, oracle 19c, Sql Server.
- **Tools/Platforms** : Git/GitHub, Docker, neovim , vim ...
- **Soft Skills** : Team collaboration, Problem-solving
- **Bash/Linux :** Linux Environments, CLI, Process Management , Package Management , Shell Scripting.

PROJECTS

Minishell : a basic Unix-like shell. It interprets and executes Unix commands, complete with essential shell functionalities.

Web Server : a C++ web server engineered for concurrent client connection management, This project served as a practical exercise in applying advanced networking and software design principles.

MiniRT: minimalist ray tracer written in C, rendering 3D scenes from RT scene files using geometric primitives. Implements lighting (ambient/directional/specular) , shadows, and multi-object rendering.
